CONTROL YOUR BUSINESS SECURITY REMOTELY USING YOUR SMARTPHONE

CAME ᵻ

CAMECONNECT.CO.UK

EFFORTLESS CONTROL OF YOUR ENTRANCE SYSTEMS

CAME Connect is a powerful cloud-based platform that allows you to remotely manage your automation systems at the touch of a button, via your smartphone or PC, using CAME's Automation app or a dedicated web page..

As part of the Internet of Things (IoT) network, this technology exploits a cloud connection to allow you to connect your CAME operators to the internet. It's simple, just add a Connect gateway product to your system to enable data to be exchanged with the CAME Connect platform.

Available on iOS and Android, the Automation app is free to download from the Apple App Store and Google Play Store. All of the apps have intuitive and customisable interfaces, letting you manage your system at a click. To automatically synchronise the Automation app with the CAME Cloud simply log in using your CAME Connect account details. The app will then allow you to manage your automation system from any location.

- Open and close operators using your smartphone, tablet or PC.

- Manage operators from up to five different mobile devices per user account.

- See the state of the automated operators, whether they are closed, open, opening, etc.

- Enable email notifications.

- Personalise the apps background image using your own photos.

TYPES OF BUSINESS THAT CAN BENEFIT FROM CAME CONNECT INCLUDE:

- **Serviced apartments**
- **Office blocks**
- **Industrial units and factories**
- **Retail and shopping centres**
- **Hotels and leisure facilities**
- **Hospitals and NHS facitlities**
- **Education Hubs**

MANAGE THE SAFETY & SECURITY OF YOUR WORKPLACE, WITH CAME CONNECT REMOTE ACCESS CONTROL

CAME's Video Entry app allows you to receive video calls directly to your mobile device, by simply connecting your IP-based entry system to your home network.

Using the Video Entry app means you can:

- Operate your system locally or remotely using the CAME Cloud.
- Receive audio and video calls directly from an entry panel or from the reception desk.
- Communicate with other mobile devices or receivers on the same system.
- Manage your lists of favourite contacts and view received, missed or rejected calls.

OPEN THE DOOR OR GATE REMOTELY

With the VideoEntry app you can open the premises door, barriers or gate, wherever you are, via your smart phone.

VIDEO VOICEMAIL

Video voicemail feature, if configured on the XTS video monitor. As well a being able to see who's calling, our entry panels feature two-way audio, so if a delivery driver's at your business, you can let them know the best place to leave the parcel.

AVAILABLE ON FOUR DEVICES

Each external entry panel is supplied with four licences as standard, allowing you to receive calls from the entry panel to your smart phone or tablet using the app.

ROUTINES THAT WORK...

LET CAME CONNECT AUTOMATE YOUR BUSINESS ROUTINE

Below are a few examples of how CAME Connect's scenarios can be used to automate everyday tasks around the workplace, saving you time.

OFFICES

SECURE YOUR OFFICE CAR PARK WITH AUTOMATIC BARRIERS THAT STAY OPEN DURING RUSH HOUR.

RETAIL & SUPERMARKETS

AUTOMATICALLY OPEN THE GATE AT SCHEDULED TIMES FOR REGULAR DELIVERIES.

SCHOOLS & COLLEGES

SET THE MAIN DOORS TO STAY OPEN AUTOMATICALLY AT SPECIFIC TIMES DURING SCHOOL HOURS ONLY.

INDUSTRIAL UNITS & WAREHOUSES

HOLD THE WAREHOUSE DOORS OPEN FOR ARRIVALS, TO PREVENT THEM FROM CLOSING AUTOMATICALLY.

IMPROVE YOUR BUSINESS EFFICIENCY

USE SCENARIOS TO AUTOMATE THE WAY YOUR BUSINESS PREMISES OPERATE

A scenario is made up of one or more commands, which can be actioned using a single button. These scenarios can be carried out at scheduled times on specific days.
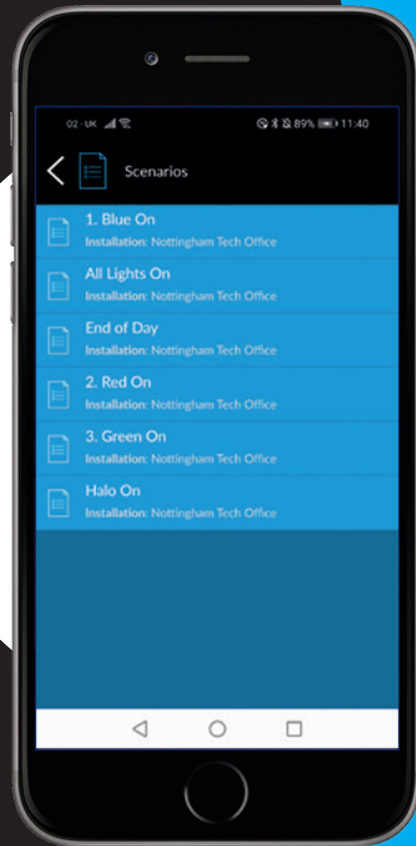

- **Convenient:** pre-set actions to ease your day to day routine.
- **Flexible:** completely customisable.
- **Time-saving:** leave daily actions to the CAME Connect system with the help of scenarios.
- **Simple:** scenarios are easy to create and use.

You can control the status of all rooms, activate scenarios, manage various automations and interact with your home from remote locations, simply by using your smartphone, table or PC.
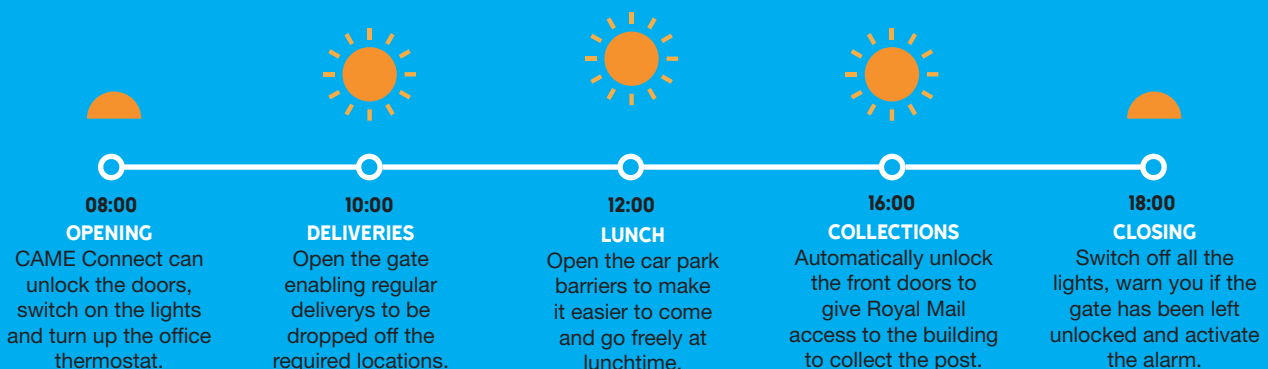

SETTING UP SCENARIOS

- Create a single button to activate the scenario on-demand.
- Select which connected devices to apply the scenario to.
- Repeat the scenario daily, weekly or monthly.
- Repeat the scenario on specific days.
- Customise the start and finish dates.
- Exclude days using the calendar, if there is a change to your usual daily schedule.

Just a few clicks on your portable device connects you, at any time, to your CAME Connect system.

Scenarios

1. Blue On
Installation: Nottingham Tech Office

All Lights On
Installation: Nottingham Tech Office

End of Day
Installation: Nottingham Tech Office

2. Red On
Installation: Nottingham Tech Office

3. Green On
Installation: Nottingham Tech Office

Halo On
Installation: Nottingham Tech Office

ONE DAY. MANY SCENARIOS.

If you have a set routine, every day tasks can be scheduled automatically, meaning you don't need to lift a finger!

08:00	10:00	12:00	16:00	18:00
OPENING	**DELIVERIES**	**LUNCH**	**COLLECTIONS**	**CLOSING**
CAME Connect can unlock the doors, switch on the lights and turn up the office thermostat.	Open the gate enabling regular deliverys to be dropped off the required locations.	Open the car park barriers to make it easier to come and go freely at lunchtime.	Automatically unlock the front doors to give Royal Mail access to the building to collect the post.	Switch off all the lights, warn you if the gate has been left unlocked and activate the alarm.

KEEP TRACK OF ALL YOUR SYSTEMS, ACROSS EVERY SITE

MONITOR THE STATUS OF YOUR AUTOMATION, FROM ANYWHERE

We understand that the security of your site is paramount to your business. Which is why Connect has been developed to provide you, and your business, wth a simple to use remote management system that gives you complete control of your perimeter security. An affordable, bolt on solution that allows remote management of your autmation systems from a mobile device or PC wherever you are in the world. Site security has never been easier.

DOWNLOAD THE FREE CAME SETUP APP

GET IT ON
Google Play

GET IT ON
App Store

Before using the CAME SetUp App you must register on the CAME Connect platform at
www.cameconnect.net/account

You, or your site manager, will be able to perform the following tasks to make supervising your site, and the installed systems, easier:

- Activate multi-functional scenarios so your system can be customised to work for you
- Enable the receipt of alerts in case of problems, minimising downtime
- Provide your installer with access to the system from a remote location, through the 'support request' function, to make changes instantly without waiting for site visits
- Perform dedicated settings, that do not affect the system's security and safety

GEOPOSITIONING

The web interface will create a list of all your installed systems, which can be viewed on a map, giving both installers and site managers total control of their automation.
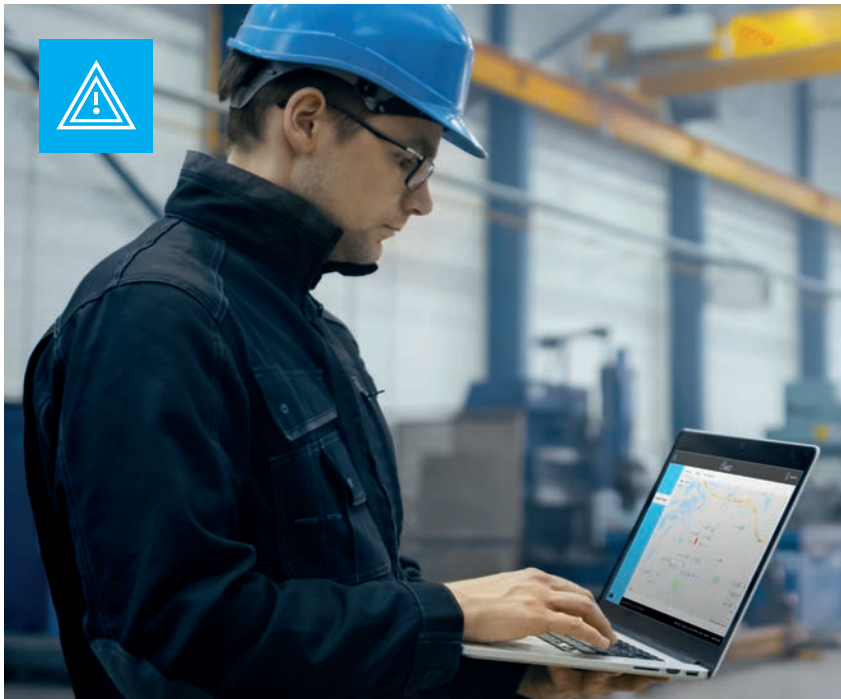

STATISTICS

The web portal lets you monitor and analyse statistics about the system's use to optimise the way you manage it and get the most efficient use out of your automation. You can track energy consumption, demand peaks and assess the frequency of maintenance jobs.

VIEWING THE SYSTEM

As well as viewing the installed system on a map, you can get a synoptic view of the system and access each device's control board to control and manage configuration preferences.

REMOTE ASSISTANCE 24/7

ONCE YOU'RE FULLY CONNECTED, YOUR INSTALLER CAN PROVIDE REMOTE SUPPORT FROM ANYWHERE, AT ANYTIME

NOTIFICATIONS & ALERTS

CAME Connect greatly improves system assistance standards, and provides status updates on your automation. The Cloud platform sends email alerts for faults as soon as they happen, so you can request immediate action from your installer. You can fully customise the alerts you receive and for which type of event, including power outages, obstacle detection or unscheduled openings.

This powerful functionality enables you to remain alerted to any abnormal behaviour from your automation system, meaning you can remain safe and secure at all times.

REMOTE SET-UP

Your installer registers your new automation system on CAME Connect. This means they can start to set up your new automation even before they have arrived on site, making the installation much more efficient.

Your installer will be able to see a list of every device installed on your site, and whether the user has granted access rights.

SUPPORT REQUESTS

You create support requests detailing which device is involved and the type of issue it is having so your installer can better understand the problem. With your permission, your installer will be able to remotely diagnose and pinpoint any potential system issues or faults by simply logging in to the SetUp app, so that your system is back up and running as quickly as possible.

MAINTENANCE & SERVICING

To improve motor efficiency and prolong lifespan, the automation requires regular maintenance. Set up a maintenance schedule with your installer, so that you will both receive email notifications when your service is due, after either a set amount of time or the number of the uses the automation has undertaken.

EASY REMOTE CONTROL SET UP

MANAGE TRANSMITTERS EFFORTLESSLY WITH CAME CONNECT

CAME Connect is ideal for multi-user contexts, such as apartment buildings and office spaces. Your site manager can oversee an unlimited number of automation systems, each with a separate user list.

As well as employees using the Automation app to operate the systems, the site manager can also program transmitters on site, from any remote location These remotes can then be assigned to individuals, providing them with the access to the areas of the building or facility that they require.

The programming and management of these remotes can be implemented though 3 different methods: QR code, local acquisition or adding them manually onto the system.
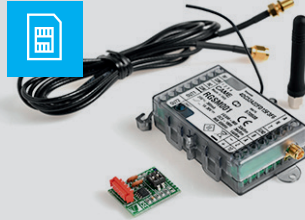

THE TECHY BIT...

CHOOSE THE CONNECTIVITY METHOD THAT SUITS YOUR BUSINESS

WIFI / ETHERNET OPTION
QBE GATEWAY

- ✔ Super-fast set-up.
- ✔ No need for mobile signal - connects directly to your home's router via either LAN cable or WiFi.
- ✔ DHCP or static IP address - no IP changes, no DDNS, no port forwarding required for standard installation.
- ✔ Can communicate with up to five radio slave modules over the radio frequency connection, up to 100m away.
- ✔ Two models available: **Ethernet/WiFi Automation only** version or **Ethernet/WiFi Full Smart Home** version.
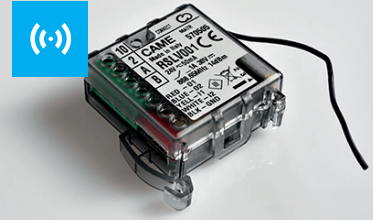

Best used when the automation is close to home's router and can recieve a strong WiFi signal.

OR GSM OPTION
RGSM GATEWAY

- ✔ Flexible solution that works well in isolated or public areas.
- ✔ Uses a GSM SIM card & GPRS (2G) to connect to the internet - very low data usage.
- ✔ Control up to to three CAME (CRP) panels & two third party (non-CRP) devices.
- ✔ Two models available: **STAND-ALONE** version, for use with only one automation _or_ **MASTER** version for communicating with multiple systems using up to five additional radio slave modules.

Best used when the automation is too far from the home's router to receive a strong WiFi connection.

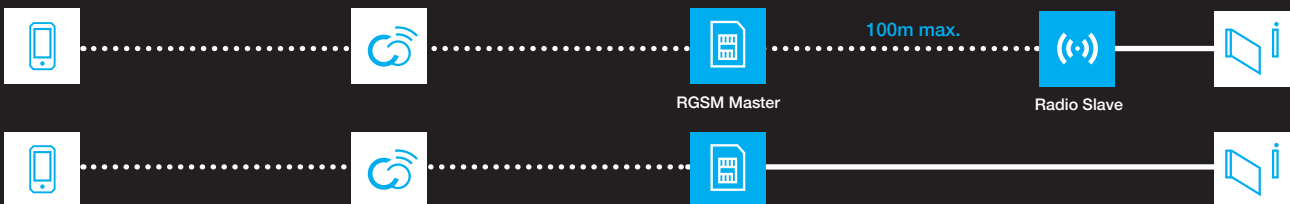

... ADD UP TO FIVE
RADIO SLAVE MODULES

- ✔ Can only be used in conjunction with the QBE or RGSM master gateways.
- ✔ Fitted to the control panel for the automation.
- ✔ Control up to to three CAME (CRP) panels & two third party (non-CRP) devices.
- ✔ Communicates wirelessly up to 100m.
- ✔ Easy third party activation & functional switching.
- ✔ Incredibly small size.

Best used when you are trying to connect third party products. Must be used in conjunction with a gateway.

GSM GATEWAY CONNECTION

100m max.

NEW FOR 2021

NEW FOR 2021

PLUGIN WIFI GATEWAY

- ✓ Super-fast set-up.
- ✓ Connects the automation to Connect cloud using home WiFi.
- ✓ Control up to three CAME operators.
- ✓ Can operate as a stand alone bluetooth device with activation for up to 5 devices.
- ✓ Connects directly into the dedicated port on the board or via the RSE slot.
- ✓ Compatible with Amazon Alexa & Google Home
- ✓ Plug and play

Best used when the automation is close to home's router and can recieve a strong WiFi signal.

PLUGIN RADIO SLV MODULE

- ✓ Connects directly to the automation, making an 868 radio-relay link with the QBE and GSM gateways.
- ✓ Easy to connect directly into board using the dedicated port on the board or via the RSE slot.
- ✓ Used with the RSLV001 and connected directly to the automation, making an 868 radio-relay link with the QBE/RETH.
- ✓ Communicates wirelessly up to 100m with the QBE or RGSM.
- ✓ Easy third-party activation & functional switching.
- ✓ Plug and play

Best used when you are trying to connect third party products. Must be used in conjunction with a gateway.

WHY USE A CERTIFIED INSTALLER?

A NETWORK OF INSTALLERS TRAINED TO THE HIGHEST STANDARDS

Your installer has attended an intensive two day practical training course to understand the benefits and best practices of the CAME Connect system.

On your request your installer will be able to make changes to the set up of your automation, as well as performing firmware updates, quickly and easily without visiting the site.

Ability to advise you on the correct ways to customise the system to work with your business, making day to day tasks simpler, thanks to the easy to use apps and automated scenarios.

You won't need to wait around for your installer to arrive or pay for unnecessary call out charges.

FIND A CAME CONNECT CERTIFIED INSTALLER

Visit **came.com/uk** today to check if your local installer is CAME Connect Certified.
