

CONTROL YOUR GATES FROM THE COMFORT OF YOUR SMARTPHONE

CAME 

CAMECONNECT.CO.UK

EFFORTLESS REMOTE CONTROL OF YOUR ENTRANCE SYSTEMS

CAME Connect is a powerful cloud-based platform that allows you to remotely manage your automation systems at the touch of a button, via your smartphone or PC, using CAME's Automation app or a dedicated web page.

As part of the Internet of Things (IoT) network, this technology exploits a cloud connection to allow you to connect your CAME operators to the internet. It's simple, just add a Connect gateway product to your system to enable data to be exchanged with the CAME Connect platform.

Available on iOS and Android, the Automation app is free to download from the Apple App Store and Google Play Store. All of the apps have intuitive and customisable interfaces, letting you manage your system at a click. To automatically synchronise the Automation app with the CAME Cloud simply log in using your CAME Connect account details. The app will then allow you to manage your automation system from any location.

- Open and close operators using your smartphone, tablet or PC.
- Manage operators from up to five different mobile devices per user account.
- See the state of the automated operators, whether they are closed, open, opening, etc.
- Enable email notifications.
- Personalise the apps background image using your own photos.

DOWNLOAD THE FREE AUTOMATION APP

Before using the Automation App you must register on the CAME Connect platform at www.cameconnect.net/account

SEE WHO'S CALLING YOUR INTERCOM, EVEN WHEN YOU'RE NOT HOME

CAME's Video Entry app allows you to receive video calls directly to your mobile device, by simply connecting your IP-based entry system to your home network.

Using the Video Entry app means you can:

- Operate your system locally or remotely using the CAME Cloud.
- Receive audio and video calls from an entry panel or from the building's concierge desk.
- Communicate with other mobile devices or receivers on the same system.
- Manage your lists of favourite contacts and view received, missed or rejected calls.

OPEN THE DOOR OR GATE REMOTELY

With CAME's Video Entry app you can open your door or gate, or turn on your lights, wherever you are, via your smart phone.

VIDEO VOICEMAIL

Expecting an important delivery and don't want to be disturbed? Simply enable video voicemail on your XTS video monitor and record an outgoing message. Incoming video and audio messages are stored to the internal memory of the video monitor, and streamed directly to your smartphone via a VideoEntry app push notification.

AVAILABLE ON FOUR DEVICES

Each external entry panel is supplied with four licences as standard, allowing you and your family to receive calls from the entry panel to your smart phones or tablets, using the app.

ROUTINES THAT WORK FOR YOU

LET CAME CONNECT HELP YOUR DAILY ROUTINE

CAME Connect's powerful scheduling platform gives you the ability to manage pre-set scenarios that automate your everyday tasks. Here's just a snapshot of how CAME Connect could help you.

MAKE LIFE A LITTLE BIT EASIER

SCENARIOS TO SAVE YOU TIME, EVERY DAY

A scenario is made up of one or more commands, which are actioned using a single button. These scenarios can be carried out at scheduled times on specific days.

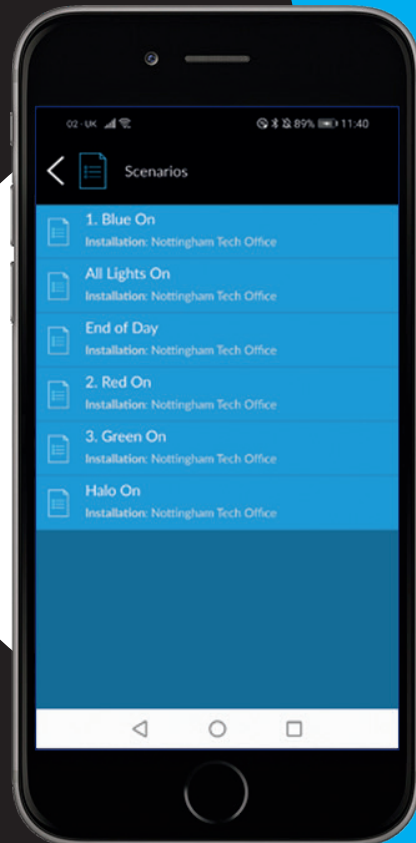

- **Convenient:** pre-set actions to ease your day to day routine.
- **Flexible:** completely customisable.
- **Time-saving:** leave daily actions to the CAME Connect system with the help of scenarios.
- **Simple:** the scenarios are easy to create and use.

You can control the status of all rooms, activate scenarios, manage various automations and interact with your home from remote locations, from your smartphone, table or PC.

SETTING UP SCENARIOS

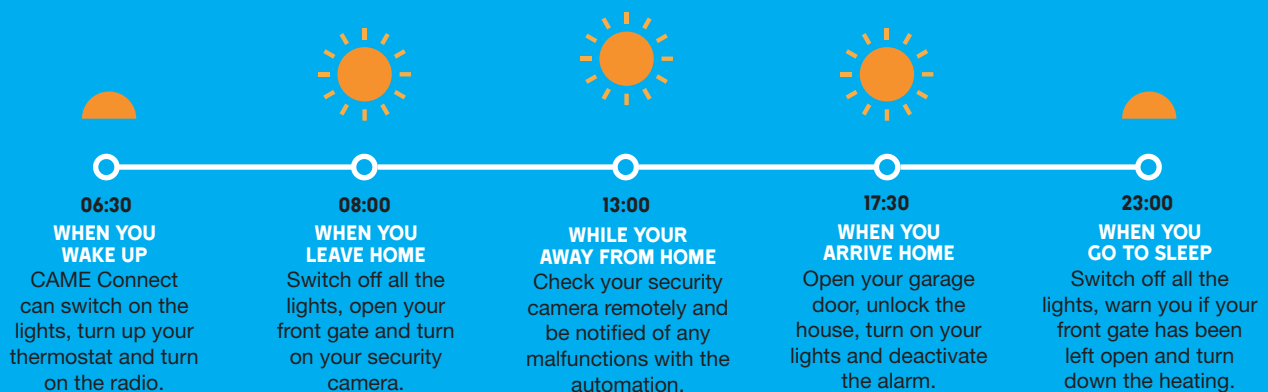

- Create a single button to activate a scenario on-demand.
- Select which connected devices to apply the scenario to.
- Repeat the scenario daily, weekly or monthly.
- Repeat the scenario on specific days.
- Customise the start and finish dates.
- Exclude days using the calendar, if there is a change to your usual daily schedule.

Just a few clicks on your portable device connects you, at any time, to your CAME Connect system.

ONE DAY. MANY SCENARIOS.

If you have a set routine, every day tasks can be scheduled automatically, meaning you don't need to lift a finger!

REMOTE ASSISTANCE 24/7

ONCE YOU'RE FULLY CONNECTED, YOUR INSTALLER CAN PROVIDE REMOTE SUPPORT FROM ANYWHERE, AT ANYTIME

NOTIFICATIONS & ALERTS

CAME Connect greatly improves system assistance standards, and provides status updates on your automation. The Cloud platform sends email alerts for faults as soon as they happen, so you can request immediate action from your installer. You can fully customise the alerts you receive and for which type of event, including power outages, obstacle detection or unscheduled openings.

This powerful functionality enables you to remain alerted to any abnormal behaviour from the system, meaning you can remain safe and secure at all times.

REMOTE SET-UP

Your installer registers your new automation system on CAME Connect. This means they can start to set up your new automation even before they have arrived on site, making the installation much more efficient.

Your installer will be able to see a list of every device installed on your site, and whether the user has granted access rights.

SUPPORT REQUESTS

You create support requests detailing which device is involved and the type of issue it is having so your installer can better understand the problem. With your permission, your installer will be able to remotely diagnose and pinpoint any potential system issues or faults by simply logging in to the SetUp app, so that your system is back up and running as quickly as possible.

MAINTENANCE & SERVICING

To improve motor efficiency and prolong lifespan, the automation requires regular maintenance. Set up a maintenance schedule with your installer, so that you will both receive email notifications when your service is due, after either a set amount of time or the number of uses the automation has undertaken.

EASY REMOTE CONTROL SET UP

MANAGE TRANSMITTERS EFFORTLESSLY WITH CAME CONNECT

NEVER WORRY ABOUT LOSING YOUR REMOTES EVER AGAIN!

Losing your remotes can be a pain and cause security concerns. CAME Connected systems avoid those concerns. These simple steps below show just how easy it is to get back up and running.

If you would like to control your automation using a remote, as well as using your smartphone app, we have a range of remotes available, in multiple colours.

Your installer will be able to manage the programming and deletion of CAME's TOP remotes from any location, thanks to CAME Connect, without having to visit the site to pair the remote to your automation.

If you need additional remotes after your automation has been installed, your Certified Installer will be able to link the new transmitters to your automation by simply scanning the unique QR code on the transmitter packaging.

Since transmitters are quickly and easily activated and deactivated using CAME Connect, this gives you peace of mind that your family and home are always secure, should your remote be lost or stolen.

Contact your Certified Installer with a request for a new remote.

Your installer can deactivate the lost remote, ensuring it can't be used.

Your installer will set up the replacement transmitter, pairing it with your automation.

Your new remote can be posted out for delivery the following day, ready for immediate use!

THE TECHY BIT...

CHOOSE THE CONNECTIVITY METHOD THAT SUITS YOUR BUSINESS

WiFi / Ethernet Option QBE Gateway

- ✓ Super-fast set-up.
- ✓ No need for mobile signal - connects directly to your home's router via either LAN cable or WiFi.
- ✓ DHCP or static IP address - no IP changes, no DDNS, no port forwarding required for standard installation.
- ✓ Can communicate with up to five radio slave modules over the radio frequency connection, up to 100m away.
- ✓ Two models available: **Ethernet/WiFi Automation only** version or **Ethernet/WiFi Full Smart Home** version.

Best used when the automation is close to home's router and can receive a strong WiFi signal.

OR GSM Option RGSIM Gateway

- ✓ Flexible solution that works well in isolated or public areas.
- ✓ Uses a GSM SIM card & GPRS (2G) to connect to the internet - very low data usage.
- ✓ Control up to three CAME (CRP) panels & two third party (non-CRP) devices.
- ✓ Two models available: **STAND-ALONE** version, for use with only one automation **or** **MASTER** version for communicating with multiple systems using up to five additional radio slave modules.

Best used when the automation is too far from the home's router to receive a strong WiFi connection.

... ADD UP TO FIVE Radio Slave Modules

- ✓ Can only be used in conjunction with the QBE or RGSIM master gateways.
- ✓ Fitted to the control panel for the automation.
- ✓ Control up to three CAME (CRP) panels & two third party (non-CRP) devices.
- ✓ Communicates wirelessly up to 100m.
- ✓ Easy third party activation & functional switching.
- ✓ Incredibly small size.

Best used when you are trying to connect third party products. Must be used in conjunction with a gateway.

GSM Gateway Connection

Internet connected smartphone or device

CAME Connect Compatible automation

CAME Cloud

... Wireless connection

— Wired connection

EASY ACCESS PLUG-IN GATEWAYS

ALL NEW EASY TO USE, PLUG-IN DEVICES FOR SIMPLE CONNECTIVITY

PLUGIN WIFI GATEWAY

- ✓ Super-fast set-up.
- ✓ Connects the automation to Connect cloud using home WiFi.
- ✓ Control up to three CAME operators.
- ✓ Can operate as a stand alone bluetooth device with activation for up to 5 devices.
- ✓ Connects directly into the dedicated port on the board or via the RSE slot.
- ✓ Compatible with Amazon Alexa & Google Home
- ✓ Plug and play

Best used when the automation is close to home's router and can receive a strong WiFi signal.

PLUGIN RADIO SLV MODULE

- ✓ Connects directly to the automation, making an 868 radio-relay link with the QBE and GSM gateways.
- ✓ Easy to connect directly into board using the dedicated port on the board or via the RSE slot.
- ✓ Used with the RSLV001 and connected directly to the automation, making an 868 radio-relay link with the QBE/RETH.
- ✓ Communicates wirelessly up to 100m with the QBE or RGSM.
- ✓ Easy third-party activation & functional switching.
- ✓ Plug and play

Best used when you are trying to connect third party products. Must be used in conjunction with a gateway.

THIRD PARTY INTEGRATION

WITH THE QBE GATEWAY, YOU HAVE THE ABILITY TO CONTROL A LARGE SELECTION OF THIRD PARTY DEVICES

As well as remotely interacting with your CAME automation you can set up additional third party smart devices and put your home to work.

The CAME Cloud can connect wirelessly to a wide range of connected devices, with seamless integration.

A range of these devices include:

- **Indoor lighting**
- **Outdoor security lighting**
- **Security cameras and CCTV**
- **House alarm systems**
- **Smart locks**
- **Thermostats and heating**
- **Speakers**
- **Motion sensors**

Want to know more about smarthome integration? Ask your installer for a copy of the dedicated brochure.

ANYBODY HOME? SET YOUR LIGHTS TO COME ON WHEN IT GETS DARK, SO IT ALWAYS LOOKS LIKE SOMEONE'S IN.

ENJOY MOVIE NIGHT. DIM THE LIGHTS & CHANGE THE THERMOSTAT TO THE PERFECT TEMPERATURE.

**ALEXA...
OPEN THE
FRONT GATE!**

AMAZON ALEXA & GOOGLE ASSISTANT INTEGRATION

CAME Connect is now compatible with digital assistants such as Amazon Alexa, enabling you to voice manage your automation systems with pre-defined skills or actions. Just say "Alexa, open the gate"

...its never been easier to control you automaton systems.

WHY USE A CERTIFIED INSTALLER?

A NETWORK OF INSTALLERS TRAINED TO THE HIGHEST STANDARDS

Your installer has attended an intensive **two day practical training course** to understand the benefits and best practices of the CAME Connect system.

On your request your installer will be able to **make changes to the set up of your automation**, as well as performing firmware updates, quickly and easily without visiting the site.

Ability to advise you on the correct ways to **customise the system** to work with your business, making day to day tasks simpler, thanks to the easy to use apps and automated scenarios.

You won't need to wait around for your installer to arrive or pay for unnecessary call out charges.
